## ENJOYING THE JOURNEY

Is there more to air travel than just getting from point A to point B? Honestly, who wants to sit constrained in their seat for the whole flight? The only chance one has to stretch tired leg muscles is while standing in the aisle, waiting for a turn at the lavatory. Why can't flying be more about relaxing and having a pleasant trip?

Coinciding with the launch of Airbus' flagship, we've been working closely with several A380 customers, engineering and manufacturing many of the furnishings and amenities they've only dreamt of offering passengers before. If you envision providing passengers with a greater experience too, we're ready to help you deliver it.

# SOCIAL ZONES A380

Social Area Concept - Zone 1 / © 2006 Heath Tecna Inc.

The A380 offers many opportunities for creating cozy and inviting spaces for passengers to enjoy. If you're looking to use these flexible areas for comfort and recreation, and need an experienced A380 equipment furnisher, depend on us to outfit your cabin. Through our full-service capabilities and global resources, we're helping others prepare their launch aircraft, and we can help you too.

Our all-inclusive approach for producing world-class aircraft interiors includes offering services such as industrial design, 3-D visualization, full-scale mock-up construction, engineering, testing (mechanical, flammability), manufacturing, certification, and product support. With a dedicated team of program managers bringing it all together, interiors are crafted that exceed customer expectations.
